

FACE HUNTER & *Planesystem*[®]

**Full Day Training by Zirkozahn & Pro-Art Dental Laboratory
July 12, 2019, 6 CE Credits**

PlaneSystem[®]
by Udo Plaster

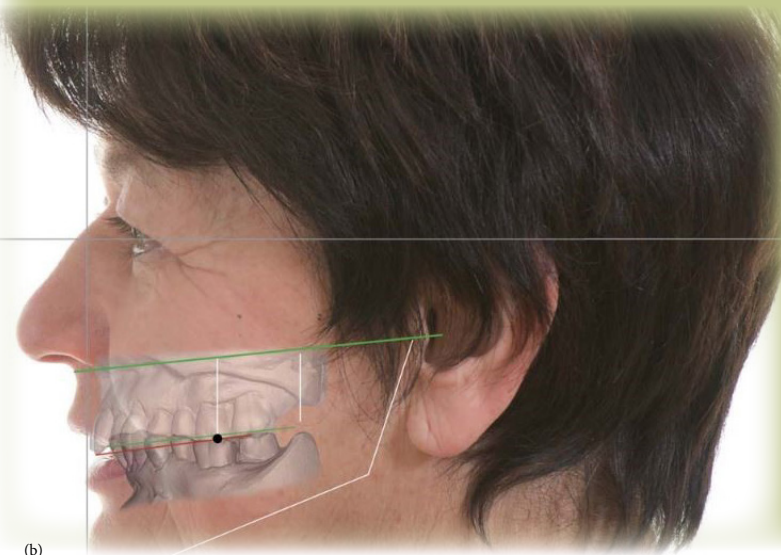

(a)

A breakthrough in digital data acquisition, which allows the doctor & the laboratory to communicate better and facilitates the ease of treatment. Now integrated in our treatment planning workflow!

We are now able to take a 3D scan of the patient's face and position the maxilla arch scan to our virtual articulator in the correct plane using the ala-tragus line as our reference. Our jaw movement analysis traces the functional parameters of the mandible and the data is transferred to our planning team to ensure the restoration will be free from any undesirable interference.

Pro-Art's individualized aesthetic and functional planning is now fully digital with utmost accuracy! This clinically driven training will be a combination of a lecture and a demonstration of the Face-Hunter & PlaneSystem. The digital path for registering the patient in the articulator will be demonstrated. The difference in treatment planning and managing occlusion using standard articulators vs Face-Hunter & PlaneSystem will also be covered.

Connect with us today to avail sophisticated, customized planning for every single patient!
