@Pro-Art Dental Laboratory

Dr. David Isen
BSc, DDS

David's dental clinic is an anaesthesia-based practice in Toronto treating patients who require intravenous sedation or advanced techniques in local anaesthesia. Many of these people have special medical needs or are dental phobic.

David is a past president of the Ontario Dental Society of Anaesthesiology. As a lecturer, he has given numerous presentations for Western University's and University of Toronto's Continuing Education Programs.

David has given over three hundred presentations throughout North America and around the world. He is a Fellow of the Academy of Dentistry International, The International College of Dentists and The Pierre Fauchard Academy.

David is the author of numerous articles. He has also peer-reviewed papers for a variety of dental journals as well as acted as a consultant for a variety of dental and pharmaceutical companies.

LEARNING OBJECTIVES

Dentists and office staff have an obligation to be prepared to manage a medical emergency. Patients rely on and expect this. However, due to the infrequency dentists encounter medical emergencies, response proficiency may be lacking.

This course will be formatted in such a way that it will be easier for you and your team to effectively manage an emergency, protecting your patients and practice.

Topics to be discussed include:

- How to prevent emergencies from occurring, including methods for anxiety management
- Learning which parts of the medical history evaluation require further action
- Understanding vital signs and what they convey
- The latest Basic Life Support protocols
- How to use an AED
- The six emergency drugs dentists must have available, how and when to use them and how to store them
- Managing medical emergencies that threaten every practice (e.g. syncope, MI, cardiac arrest, allergy, asthma and more)
